Complete solutions for power generation

Owner:	 Pujol - Marti Group
Contractor:	Energy International Corp.
Engines:	2 x Cat® 12CM32 engines manufactured in Kiel, Germany
Location:	Caldera, Costa Rica
Application:	Power generation for inside-the-fence industrial requirements.
Technical Data:	Mechanical power output: 2 x 5,760 kW (11.2 MWe power plant) Thermal power output: 2 x 400 kW as Thermal Oil

Energy International offers integrated energy solutions with the highest quality engineering, procurement, project management and construction services in the industry. We partner with HMV Engineers to provide state-of-the-art engineering.

Cat and Caterpillar are registered trademarks of Caterpillar Inc.

Complete solutions for power generation

Caldera

Fuel:

Heavy fuel oil - 700 cst @ 50C°

Generator:

3 phase synchronous generator
2 x 6,984 kVA, 13.8 kV, 60 Hertz

Substation:

Air Insulated Type, 2 x 7,000 kVA, 13.8/34.5 kV,
ONAN Step up Transformers
34.5 kV medium voltage switchgear with two
feeders and one main

Switchgear:

SEG 13.8 kV medium voltage, 480 V low
voltage, control and SCADA system

Waste Heat Recovery:

PWT thermal boilers, 2 x 400 kWh

Main Contractor:

Energy International

Engineering:

HMV Engineers

Civil Works and Erection:

Energy International

Commenced Operations:

September 8, 2004

Operation & Maintenance:

Energy International - 5 year full O&M
contract

Customer Benefits

Increased power quality and reliability

With the help of Energy International, the Pujol-Martí Group purchased HFO generator sets to produce and control its own power supply permitting lower cost of power for this industrial group and no more losses of materials due to power failures.

Cost effective power

The new medium speed engines produce power at a lower price per kilowatt hour, allowing more cost effective production.

Selling extra capacity to the grid

The Pujol-Martí Group was able to negotiate a Power Purchase Agreement "PPA" for the sale of energy.
